

CHIEF TECHNOLOGY OFFICER (CTO) STRATEGIC PLAN FOR THE LAST 6 MONTH OF THE YEAR

Reporting Period: JULY 2026 to DECEMBER

Submitted To:

The office of Chairman EIBGROUP

Prepared By:

Engr Ibrahim Ladan (GCTO)

Executive Summary

The second half of the year presents a critical opportunity for the I.T Department to consolidate achievements, optimize operational costs, and position the organization for sustainable growth. The Group Chief Technology Officer (CTO) will focus on improving infrastructure resilience, enhancing cybersecurity, increasing operational efficiency, and delivering measurable business value through technology.

The strategic direction for the remaining six months is centered around nine major pillars:

1. Network Infrastructure Upgrade
2. Cybersecurity Enhancement
3. IT Cost Optimization
4. Virtualization & Cloud Optimization
5. Data Centre Actualization
6. Human Capital Development
7. Software Development & Automation
8. Power Backup
9. I.T Governance, Risk & Compliance

The expected outcomes include:

- 99% network availability
- 30–40% reduction in recurring technology operational costs
- Improved cybersecurity maturity
- Increased infrastructure scalability
- Better service delivery
- Reduced system downtime
- Enhanced staff productivity
- Stronger governance and compliance

The CTO's strategy aligns technology investments with corporate objectives while ensuring operational excellence, business continuity, innovation, and long-term sustainability.

Strategic Vision

Vision Statement

To establish a secure, resilient, intelligent, sustainable power backup and innovative technology ecosystem that drives business excellence, enables digital transformation, and supports sustainable growth for all EIB Group of Companies.

Mission Statement

To provide reliable, secure, scalable, and cost-effective technology services that enhance operational performance, improve staff and customer experience, and support strategic business objectives across all the subsidiary in the EIB Group of Companies, while ensuring that technology remains a strategic business enabler rather than merely a support function.

Current Performance Review

Infrastructure Achievements

- Stable local network
- Improved WAN connectivity
- Improved wireless coverage
- Increased server availability

Challenges

- Aging network equipment
- High bandwidth costs
- Legacy servers
- Automation
- Capacity constraints
- Backup management

Assessment

Area	Current Status	Rating
LAN	Poor	25%
WAN	Good	85%
Internet	Stable	90%
Wireless	Fair	70%
Server Infrastructure	Good	85%
Data Centre	Very Poor	20%

Cybersecurity

Strengths

- Open-Source Firewall deployment
- VPN implementation
- Access control
- Basic Network monitoring

Challenges

- Increasing phishing attacks
- Insider threats
- User awareness
- Limited automation

Current Maturity

Level 3 (Managed)

Target

Level 4 (Quantitatively Managed)

Network Performance

Current KPI

KPI	Current	Target
Network Availability	80%	99.95%
Internet Availability	82%	99.98%
MTTR	3 Hours	<1 Hour
Packet Loss	25%	< 5%
Network Utilization	80%	95%

Virtualization

Achievements

- Server consolidation
- Reduced hardware purchases
- Better resource utilization

Current Utilization 45%

Target 90%

HYPERVISION PLATFORM

Data Centre

(All activities done with the absence of a functional Data Centre)

Human Capital

Current Status

- Skilled infrastructure engineers 40%
- Growing cybersecurity team 30%
- Basic cloud knowledge 65%

Gaps

- AI
- Cloud Architecture (SAAS, PAAS, IAAS)
- Automation
- Threat Hunting (SOC)
- Data Analytics

In summary, AI credits and a functional SOC is highly needed

Financial Performance

Positive Outcomes

- Reduced hardware procurement
- Better license utilization

- Improved asset lifecycle
- Reduce Bandwidth Cost by 60%
- Cut off Last Mile Infrastructure Cost
- Reduce I.T OPEX

Challenges

- Rising ISP costs
- Energy costs
- Maintenance

Strategic Objectives (July – December 2026)

Objective 1

Improve Network Reliability

Goal

Achieve enterprise-class network performance.

Key Actions

- Upgrade aging Core switches
- Upgrade core routers
- Increase redundancy
- Improve WAN resilience (Secondary Provider)
- More bandwidth Optimization
- Data Centre Actualization
- Proper Infrastructure Power Backup

KPI

- 99.95% uptime
- MTTR <1 hour
- Packet loss below < 1%

Objective 2

Strengthen Cybersecurity

Goal

Protect business assets against emerging cyber threats.

Initiatives

- Zero Trust implementation
- Vulnerability assessments
- Penetration testing
- SIEM Development
- SOC Actualization
- Security awareness training

KPIs

- 95% patch compliance within SLA
- 50% reduction in phishing success rate
- 30% reduction in security incidents

Objective 3

Optimize IT Costs

Goal

Deliver measurable financial savings while maintaining service quality.

Initiatives

- Internet bandwidth optimization
- Vendor contract renegotiation
- Virtualization expansion
- Renewable Energy efficiency improvements
- Asset lifecycle optimization

Target Savings

- 30% reduction in bandwidth costs
- 25% reduction in server maintenance and storage costs
- 30% reduction in power consumption for Infrastructure

The screenshot displays the Mikrotik WinBox 4.1 interface. The left sidebar contains a navigation menu with categories like Quick Set, WiFi, User Manager, Wireless, Interfaces, WireGuard, Bridge, PPP, Switch, Mesh, IP, IPv6, MPLS, Routing, System, Queues, Dot1X, Files, LCD, Log, New Terminal, RADIUS, Tools, Partition, and Make Support.rtf. The main window is divided into several tabs: Firewall (selected), Filter Rules, NAT, Mangle, Raw, Service Ports, Connections, Address Lists, and Layer7 Protocols. The Firewall tab is further divided into a list of rules and a detailed view of a selected rule. The Connections tab shows a table of active connections. The Resources panel on the right provides system information.

Rule	Src. Address	Src. Port	Dst. Address	Dst. Port	Reply Src. Ad...	Reply Dst. Ad...	Protocol

Objective 4

Expand Virtualization and Cloud Readiness

Initiatives

- Increase server virtualization
- Storage optimization (NAS)
- Hypervisor upgrades
- Automated provisioning
- Backup modernization
- Disaster recovery

Target

- 90% server virtualization
- 40% storage optimization
- 99.99% VM availability

Objective 5

Data Centre Actualization

Projects

- Intelligent fire suppression systems FM 200 or Novec 1230
- Rack optimization
- Environmental monitoring (HVAC)
- Power redundancy (Standard Solar Deployment)
- Cooling optimization
- Capacity planning
- Disaster recovery enhancement

KPIs

- Zero fire-related incidents
- 99.99% power availability
- 100% environmental monitoring coverage

Objective 6

Accelerate Digital Transformation

Projects

- Workflow automation
- Electronic document management
- Operational Application
- API integration
- AI-assisted reporting
- Self-service IT portal

KPIs

- 60% reduction in manual processes
- 70% faster service delivery
- 80% user adoption of digital workflows

CLOUD STORAGE

HR PORTAL

DISK MONITORING PLATFORM

LIVE STREAM MONITORING

NEW STREAMING PLATFORM

BLUE TO BLACK CONNECTION CAPACITY

Objective 7

Develop Human Capital

Focus Areas

- Cloud Computing
- Cybersecurity
- DevSecOps
- Automation
- AI
- Leadership
- Project Management
- Business Analysis

KPIs

- 95% training completion
- 80% professional certification rate
- 25% improvement in employee productivity
- 90% employee retention

Objective 8

Improve Governance and Compliance

Initiatives

- IT policy review
- Risk assessments
- Disaster recovery testing
- Business continuity exercises
- KPI reporting dashboards

KPIs

- 100% compliance with IT policies
- Quarterly risk assessments completed
- 100% disaster recovery tests completed as scheduled

Expected Outcomes by Year-End

By executing this strategic plan over the final six months of the year, the CTO's office aims to achieve:

- **Technology Excellence:** 99.95% network availability, improved system resilience, and reduced service interruptions.
- **Cybersecurity Maturity:** Stronger defenses through Zero Trust principles, enhanced monitoring, and proactive threat management.
- **Operational Efficiency:** Reduced manual processes, faster service delivery, and improved IT support performance through automation.
- **Financial Optimization:** Lower operating costs through bandwidth optimization, virtualization, storage management, and energy efficiency.
- **Infrastructure Modernization:** Upgraded network, virtualized infrastructure, and a more resilient, scalable data center.
- **Workforce Capability:** A highly skilled technology team equipped with certifications and competencies in network, cloud, cybersecurity, automation, and leadership.
- **Governance and Compliance:** Improved IT governance, risk management, business continuity, and audit readiness.
- **Business Value:** Technology positioned as a strategic enabler that supports organizational growth, innovation, and long-term sustainability.

Final Note:

This report provides a structured executive roadmap for the CTO to drive measurable performance improvements during the last six months of the year while aligning technology initiatives with organizational objectives and delivering clear value to executive management of the EIB GROUP of companies.
