12. SWOT Analysis
13. Challenges and Recommendations
14. Conclusion

EXECUTIVE SUMMARY

The reporting period from March 2026 to June10th 2026 witnessed steady operational growth and organizational development across the EIB Group.

As Group Chief Operations Officer, emphasis was placed on ensuring effective coordination of operations across all subsidiaries while aligning operational activities with the strategic vision of the Group.

Key operational priorities during the period included:

- Improving service delivery standards.
- Strengthening operational controls.
- Enhancing business development activities.
- Improving profitability across subsidiaries.
- Strengthening workforce capacity.
- Enhancing compliance and governance systems.
- Supporting innovation and business expansion.

The subsidiaries under review include:

- EIB Stratoc Limited
- Giga Forensics Limited
- Briech UAS Limited
- Poctova Limited
- Lufttrieber Automobile Limited

Overall, the Group recorded positive operational achievements despite prevailing economic pressures, inflationary challenges, rising production costs, and increased market competition.

Strategic efforts undertaken during the reporting period have positioned the Group for stronger performance during the second half of the financial year.

INTRODUCTION

The EIB Group of Companies is a diversified business conglomerate operating across multiple sectors including security services, unmanned aerial systems, digital forensic services, manufacturing, and automobile services.

The Group continues to pursue excellence through innovation, operational efficiency, strategic partnerships, and human capital development.

The office of the Group Chief Operations Officer serves as the central coordinating office responsible for:

- Operational supervision.
- Business process optimization.
- Strategic execution.
- Performance monitoring.
- Inter-company coordination.
- Resource allocation oversight.
- Operational risk management.

The reporting period provided an opportunity to consolidate operational gains while identifying new growth opportunities across all subsidiaries.

OVERVIEW OF EIB Group

The EIB Group continues to evolve into a diversified enterprise with interests spanning multiple industries.

The Group currently comprises:

EIB STRATOC Limited

A leading provider of security services, infrastructure protection, Geospatial intelligence, pipeline monitoring, mapping project support services, and specialized operational management solutions.

Giga Forensics Limited

A technology-focused organization providing digital forensic investigations, cybersecurity assessments, cyber intelligence services, and electronic evidence management solutions.

Briech UAS Limited

A leading unmanned aerial systems company specializing in drone manufacturing, surveillance, aerial inspections, and aviation-related services.

Poctova Limited

A garment manufacturing company specializing in the production of security uniforms, institutional apparel, workwear, ceremonial garments, and customized clothing solutions.

The company currently executes large-scale production contracts for:

- National Youth Service Corps (NYSC)
- Department of State Services (DSS)

and continues to position itself as a strategic supplier to government institutions and security agencies.

Luftrieber Automobile Limited

A company providing automobile sales, fleet management, vehicle maintenance, technical support services, and transportation solutions.

ECONOMIC AND BUSINESS ENVIRONMENT

The reporting period was marked by significant economic developments affecting business operations throughout Nigeria.

Key challenges included:

Inflationary Pressures

Rising inflation resulted in increased operational expenses, including:

- Fuel costs
- Logistics costs
- Raw material procurement costs
- Utility expenses

Exchange Rate Volatility

The fluctuation of foreign exchange rates significantly impacted:

- Equipment procurement
- Technology acquisitions
- Manufacturing inputs
- Spare parts purchases

Industry Competition

Increased competition across the Group's operating sectors necessitated stronger customer engagement and improved service delivery.

Regulatory Environment

Regulatory compliance remained a priority, particularly within:

- Aviation operations
- Security services
- Manufacturing activities
- Data protection and cyber security services

Despite these challenges, the Group successfully maintained operational stability through proactive management interventions.

CONSOLIDATED MONTHLY PERFORMANCE REPORT

GROUP-WIDE PERFORMANCE OVERVIEW

The Group maintained active operations throughout the reporting period with all subsidiaries contributing toward organizational objectives.

Management efforts focused on:

- Revenue generation.
- Cost optimization.
- Market expansion.
- Workforce productivity.
- Customer retention.

Several subsidiaries demonstrated strong operational performance while others required additional management support and strategic intervention.

The Group continued to emphasize accountability, performance monitoring, and operational excellence across all business units.

EIB STRATOC LIMITED

Operational Performance Review

EIB Stratoc remained one of the strongest performing subsidiaries during the reporting period.

The company continued to deliver security support services across multiple projects while maintaining high standards of professionalism and operational effectiveness.

Major operational activities included:

- Security operations management.
- Project support services.
- Infrastructure protection assignments.
- Client relationship management.
- Operational monitoring and reporting.

Geospatial Intelligence Services

The company continued providing:

- Mapping services.
- Surveying support.
- Geospatial data acquisition.
- Orthomosaic generation.
- Topographic analysis.

The company demonstrated resilience despite evolving security challenges and increasing client expectations.

Key Achievements

- Successful execution of security contracts.
- Improved incident response capabilities.
- Enhanced operational coordination.
- Strengthened stakeholder relationships.
- Increased operational accountability.

Challenges

- Rising operational costs.
- Recruitment of specialized personnel.
- Increasing security threats.

Recommendations

- Expansion of technology-assisted security solutions.
- Additional training programs.

GIGA FORENSICS LIMITED

Operational Performance Review

Giga Forensics continued to strengthen its reputation as a leading provider of digital forensic and cyber investigation services.

Growing demand for cyber security solutions created new opportunities for expansion and service diversification.

Major activities included:

- Digital forensic investigations.
- Cybersecurity assessments.
- Data recovery services.
- Cyber intelligence support.

- Electronic evidence management.

Key Achievements

- Expansion of client engagements.
- Improved technical capabilities.
- Increased awareness of forensic services.
- Development of strategic applications and partnerships.

Strategic Outlook

Management intends to position Giga Forensics as a regional leader in cyber security and digital investigation services.

SUBSIDIARY OPERATIONAL PERFORMANCE REVIEW

BRIECH UAS LIMITED

Introduction

Briech UAS Limited continued to consolidate its position as one of Nigeria's leading providers of Unmanned Aerial Systems (UAS) solutions. During the reporting period, the company maintained a strong focus on surveillance operations, aerial inspections, geospatial intelligence services, pipeline monitoring, mapping solutions, and emerging drone technology applications.

The increasing demand for drone technology within the oil and gas, security, construction, mining, and agricultural sectors presents significant growth opportunities for the company. Management continued to pursue initiatives aimed at strengthening operational capacity while maintaining strict compliance with aviation regulations.

Operational Activities

During the reporting period, Briech UAS successfully executed several operational assignments in conjunction with EIB STRATOC involving:

Pipeline Surveillance Operations

The company continued to support critical infrastructure monitoring activities through drone-based surveillance systems.

Key operational objectives included:

- Detection of unauthorized activities along pipeline corridors.
- Monitoring of Right of Way (ROW) conditions.
- Identification of environmental threats.
- Security assessment of critical infrastructure.
- Generation of actionable intelligence reports.

Drone deployments significantly improved monitoring efficiency compared to conventional ground-based patrol systems.

Aerial Inspection Services

The company expanded aerial inspection services covering:

- Mining Sites
- Construction projects.
- Oil and gas facilities.
- Industrial installations.

These inspections provided clients with real-time data, reduced operational risks, and improved maintenance planning.

Safety and Regulatory Compliance

A major priority throughout the reporting period was maintaining strict compliance with aviation regulations.

Management ensured:

- Adherence to flight safety procedures.
- Continuous pilot competency evaluations.
- Equipment maintenance schedules.
- Incident reporting protocols.
- Regulatory documentation updates.

No major safety incidents were recorded during the reporting period.

Human Capital Development

Investment in personnel development remained a strategic priority.

Training areas included:

- Flight operations.
- Mission planning.
- Aviation safety.
- Data processing.
- Emergency response procedures.

The company also intensified efforts toward developing future UAV pilots and technical specialists.

Business Development Activities

Several engagements were initiated with:

- Oil and gas companies.
- Government agencies.
- Security organizations.
- Mining operators.

Management remains optimistic regarding increased commercial opportunities within these sectors.

Challenges

Key operational challenges included:

- Regulatory restrictions affecting certain flight operations.
- High cost of drone equipment procurement.
- Foreign exchange volatility.
- Limited local availability of specialized spare parts.

Recommendations

Management recommends:

- Expansion of drone fleet capabilities.
- Establishment of additional operational bases.
- Increased investment in pilot training.
- Development of drone manufacturing partnerships.
- Expansion into regional markets.

POCTOVA LIMITED

Introduction

Poctova Limited remains one of the Group's most strategic manufacturing subsidiaries and continues to play a critical role in Nigeria's garment manufacturing sector.

The company specializes in:

- Security uniforms.
- Institutional apparel.

- Corporate uniforms.
- Workwear production.
- Ceremonial attire.
- Customized garment manufacturing.

During the reporting period, Poctova continued the successful execution of major production contracts for:

- Department of State Services (DSS)

These contracts further strengthened the company's reputation as a dependable supplier of high-quality uniforms and specialized apparel.

Production Operations Review

Production activities remained robust throughout the reporting period.

Management focused on:

- Meeting client delivery schedules.
- Maintaining product quality.
- Increasing production efficiency.
- Optimizing workforce productivity.
- Managing production costs.

Daily production operations were closely monitored to ensure compliance with client specifications and quality standards.

DSS Uniform Production

One of the most significant activities during the reporting period is the continued production of uniforms for the DSS

The project involved:

- Fabric sourcing and quality verification.
- Pattern development.
- Cutting operations.
- Sewing and assembly.
- Quality inspections.
- Packaging and delivery.

The project required:

- Strict adherence to specifications.
- High-quality material selection.

- Enhanced quality control procedures.
- Timely delivery schedules.
- Confidential production management processes.

Management maintained close oversight to ensure compliance with all contractual obligations.

The successful delivery of DSS uniforms further strengthened client confidence and reinforced the company's credibility within the security sector.

Quality Assurance and Control

Quality remains one of Poctova's strongest competitive advantages.

The company maintained rigorous quality assurance procedures covering:

- Fabric inspection.
- Measurement verification.
- Stitch quality assessment.
- Final product inspection.
- Packaging standards.

Regular audits ensured that all products met required specifications before delivery.

Management believes maintaining superior quality standards will remain critical to future growth.

Workforce Performance

The factory workforce demonstrated strong commitment throughout the reporting period.

Employees were engaged across:

- Cutting sections.
- Sewing sections.
- Finishing departments.
- Quality control units.
- Packaging operations.

Continuous supervision and training contributed significantly to improved productivity levels.

Machinery and Equipment Utilization

Production machinery operated efficiently during the reporting period.

Equipment utilized included:

- Industrial sewing machines.
- Buttonhole machines.
- Cutting equipment.
- Pressing equipment.

Routine maintenance programs minimized downtime and improved operational efficiency.

Supply Chain Management

Management implemented proactive procurement strategies aimed at ensuring uninterrupted production.

Major focus areas included:

- Fabric procurement.
- Accessories sourcing.
- Inventory management.
- Supplier relationship management.

Despite market fluctuations, the company maintained sufficient inventory levels to support ongoing production activities.

Business Development Initiatives

Management continued efforts toward expanding the company's customer base.

Potential opportunities were identified within:

- Nigerian Armed Forces.
- Nigeria Police Force.
- Nigeria Security and Civil Defence Corps.
- Customs Service.
- Immigration Service.
- Private security companies.
- Oil and gas companies.

The company is strategically positioned to become one of the largest uniform manufacturers in Nigeria.

Strategic Growth Opportunities

Future expansion opportunities include:

Industrial Workwear Production

Production of specialized workwear for:

- Oil and gas companies.
- Construction firms.
- Manufacturing organizations.
- Aviation industries

Protective Equipment Manufacturing

Potential expansion into:

- Protective clothing.
- Safety garments.
- Specialized PPE products.

Challenges

Challenges encountered during the reporting period included:

- Rising fabric costs.
- Exchange rate fluctuations.
- Supply chain disruptions.
- Increasing energy costs.

Recommendations

Management recommends:

- Expansion of factory capacity.
- Acquisition of additional automated equipment.
- Increased government contract participation.
- Development of export-focused operations.
- Enhanced workforce training programs.

Conclusion

Poctova remains one of the Group's most promising growth subsidiaries.

Its successful execution of NYSC and DSS contracts demonstrates its manufacturing capability, operational discipline, and potential for long-term expansion.

Management remains confident that with appropriate investment and strategic support, Poctova can emerge as a leading uniform and industrial garment manufacturer within Nigeria and the West African region.

LUFTRIEBER AUTOMOBILE LIMITED

Introduction

Lufttrieber Automobile Limited continued to strengthen its position within the EIB Group as a provider of automobile sales, fleet management, vehicle maintenance, technical support services, and transportation solutions.

The company plays a strategic role in supporting both internal Group operations and external customers by ensuring vehicle availability, reliability, and operational efficiency.

During the reporting period, management focused on improving workshop operations, enhancing customer satisfaction, expanding service offerings, and strengthening the company's market presence within Nigeria's automotive industry.

Operational Performance Review

The company's operational activities during the reporting period were concentrated in the following areas:

Fleet Management Services

Lufttrieber Automobile continued to provide fleet management support to both Group subsidiaries and external clients.

Services rendered included:

- Preventive maintenance scheduling.
- Vehicle inspection programs.
- Fleet utilization monitoring.
- Maintenance record management.

These activities contributed significantly toward reducing vehicle downtime and improving operational efficiency.

Vehicle Maintenance and Repairs

The workshop division remained actively engaged in providing maintenance and repair services.

Services performed included:

- Routine servicing.
- Engine diagnostics.
- Mechanical repairs.
- Electrical system maintenance.
- Suspension repairs.
- Brake system servicing.
- Transmission maintenance.

Management emphasized preventive maintenance practices aimed at reducing long-term operating costs and extending vehicle lifespan.

Customer Service Improvement

Recognizing the importance of customer satisfaction, management introduced measures to improve service delivery.

These included:

- Faster service turnaround times.
- Improved spare parts quality
- Improved customer communication.
- Better maintenance scheduling.
- Enhanced service quality monitoring.
- Improved after-sales support.

These initiatives strengthened customer confidence and contributed to increased client retention.

Workshop Capacity Development

The company continued efforts to improve workshop efficiency through:

- Equipment upgrades.
- Improved maintenance procedures.
- Staff technical development.
- Better inventory management.

The objective remains the establishment of a world-class automotive service center capable of serving both private and corporate clients.

Spare Parts and Inventory Management

Management implemented stricter inventory control measures to ensure the availability of critical spare parts while minimizing excessive stockholding.

Key improvements included:

- Inventory tracking systems.
- Supplier relationship management.
- Procurement planning.
- Cost control measures.

These initiatives helped improve operational efficiency despite market volatility affecting spare parts availability.

Business Development Activities

The company intensified efforts toward business expansion through:

- Fleet maintenance contracts.
- Corporate vehicle management services.
- Vehicle sales opportunities.
- Technical consulting services.
- Government fleet support services.

Management also explored strategic partnerships with automobile manufacturers and fleet operators.

Challenges

The company encountered several operational challenges including:

Foreign Exchange Volatility

The cost of imported spare parts increased significantly during the reporting period.

Inflationary Pressures

Rising operational costs affected workshop operations and service delivery.

Market Competition

Competition from independent workshops and established dealerships remained intense.

Customer Purchasing Power

Reduced consumer spending affected vehicle acquisition and maintenance decisions.

Recommendations

Management recommends:

- Expansion of workshop facilities.
- Increased automation of service processes.
- Strategic partnerships with vehicle manufacturers.
- Development of specialized vehicle maintenance programs.

Conclusion

Luftrieber Automobile remains strategically positioned to support transportation and fleet management requirements within the Group while expanding its commercial market presence.

With continued investment and operational improvements, the company is expected to become a major contributor to Group revenue growth.

STRATEGIC GROWTH REPORT

Introduction

One of the primary responsibilities of the Group Chief Operations Officer is identifying and driving sustainable growth opportunities across all subsidiaries.

During the reporting period, management pursued several strategic initiatives aimed at strengthening the Group's competitive position and ensuring long-term sustainability.

These initiatives focused on:

- Market expansion.
- Service diversification.
- Strategic partnerships.
- Technology adoption.
- Capacity development.
- Revenue growth.

Strategic Vision

The EIB Group's strategic vision remains focused on becoming one of Africa's leading diversified business groups through:

- Operational excellence.
- Innovation.
- Strategic investments.
- Human capital development.
- Customer-centric service delivery.

The Group continues to leverage the strengths of each subsidiary to create synergies and maximize business opportunities.

New Market Opportunities

EIB Stratoc

Potential growth opportunities identified include:

- Critical infrastructure protection.

- Oil and gas security support.
- Government security contracts.
- Technology-enabled security solutions.
- Security consulting services.

Giga Forensics

Emerging opportunities include:

- Cybersecurity consulting.
- Digital investigations.
- Corporate cyber risk assessments.
- Financial crime investigations.
- Electronic evidence management.

Briech UAS

Growth opportunities include:

- Agricultural drone services.
- Mining sector applications.
- Environmental monitoring.
- Infrastructure inspections.
- Smart city surveillance solutions.

Poctova Limited

Significant opportunities exist in:

- Military uniform production.
- Industrial workwear manufacturing.
- PPE production.
- Export garment manufacturing.
- Corporate uniform supply.

Luftrieber Automobile

Future opportunities include:

- Fleet leasing.
- Corporate fleet management.
- Vehicle financing partnerships.
- Automobile training services.
- Specialized maintenance contracts.

Strategic Partnerships

Several partnership opportunities were pursued during the reporting period.

Potential partners include:

- Government agencies.
- International development organizations.
- Oil and gas operators.
- Technology providers.
- Manufacturing companies.
- Security institutions.

These partnerships are expected to generate new revenue streams and improve operational capabilities.

Innovation Initiatives

The Group continued promoting innovation across all subsidiaries.

Technology Adoption

Several initiatives were undertaken including:

- Automation of operational processes.
- Digital reporting systems.
- Improved data management.
- Enhanced communication platforms.
- Enhanced video conferencing platform

Research and Development

Management encouraged subsidiaries to identify innovative solutions capable of improving efficiency and reducing operational costs.

Market Penetration Strategies

The Group adopted several market penetration strategies:

- Enhanced client engagement.
- Improved customer service.
- Brand visibility campaigns.
- Strategic networking.
- Proposal development initiatives.

These efforts have contributed positively toward business development activities.

Growth Projections

Management projects steady growth across all subsidiaries over the next three years.

Expected outcomes include:

- Increased revenues.
- Improved profitability.
- Expanded market share.
- Enhanced operational efficiency.
- Greater regional presence.

The successful implementation of current strategic initiatives will be critical in achieving these objectives.

HUMAN CAPITAL DEVELOPMENT REPORT

Introduction

The Group recognizes that human capital remains one of its most valuable assets.

Accordingly, significant attention was devoted toward workforce development, employee engagement, leadership cultivation, and succession planning during the reporting period.

The objective remains the development of a highly skilled, motivated, and productive workforce capable of supporting the Group's long-term strategic goals.

Workforce Overview

The Group maintained a diverse workforce across all subsidiaries, comprising:

- Management personnel.
- Technical specialists.
- Administrative staff.
- Production personnel.
- Field operators.
- Support staff.

Employees continued to demonstrate commitment toward achieving organizational objectives despite challenging economic conditions.

Recruitment Activities

Recruitment efforts focused on strengthening operational capacity within critical business areas.

Positions recruited for included:

EIB Stratoc

- Campers

Giga Forensics

- Nil

Briech UAS

- Nil

Poctova Limited

- Nil

Luftrieber Automobile

- Nil

Training and Capacity Development

Management continued investing in employee development through structured training programs.

Training areas included:

- Technical skills enhancement.
- Health and safety awareness.
- Operational efficiency.

The objective was to improve employee competence while strengthening organizational performance.

Leadership Development

Management recognizes that future organizational success depends on leadership continuity.

Several initiatives were therefore implemented to:

- Identify high-potential employees.
- Develop future leaders.
- Strengthen management capacity.
- Improve decision-making capabilities.

These efforts form part of the Group's long-term succession planning framework.

Employee Retention Initiatives

Management implemented measures aimed at improving employee retention.

Key initiatives included:

- Employee recognition programs.
- Career development opportunities.
- Improved communication channels.
- Enhanced workplace engagement.
- Friday exercise time/movie day

These initiatives contributed positively toward workforce stability.

Succession Planning

The Group continued strengthening succession planning processes for critical operational and management positions.

This initiative aims to:

- Reduce operational disruptions.
- Ensure leadership continuity.
- Retain institutional knowledge.
- Improve long-term sustainability.

Workforce Planning

Future workforce plans include:

- Strategic recruitment.
- Leadership development.
- Skills enhancement.
- Workforce optimization.

Management remains committed to building a workforce capable of supporting future expansion objectives.

FINANCIAL OVERSIGHT REPORT

Introduction

Financial sustainability remains one of the most critical pillars supporting the long-term success of the EIB Group of Companies. Throughout the reporting period, Management maintained close oversight of the financial performance of all subsidiaries to ensure that operational activities remained aligned with approved budgets, strategic objectives, and profitability targets.

Despite macroeconomic challenges affecting businesses across Nigeria, including inflationary pressures, exchange rate volatility, increased borrowing costs, and rising operational expenses, the Group continued to demonstrate resilience through prudent financial management and disciplined operational execution.

The primary objectives of financial oversight during the reporting period were:

- Cost optimization.
- Budget compliance.
- Profitability enhancement.
- Financial risk management.
- Efficient resource allocation.

Group Financial Performance Overview

During the reporting period, all subsidiaries remained operational and contributed toward the Group's overall revenue generation objectives.

Further breakdown could be provided by the accounts department of the group.

Cost Optimization Initiatives

Recognizing the impact of inflation and rising operational expenses, Management is currently implementing several cost optimization initiatives across the Group.

These new implementations included:

Procurement Controls

- Improved vendor evaluation processes.
- Competitive sourcing procedures.
- Centralized procurement oversight.
- Enhanced contract negotiation.

Resource Utilization

- Improved fleet utilization.

- Better equipment deployment.
- Workforce productivity monitoring.
- Asset management optimization.

Operational Efficiency

- Reduction of operational waste.
- Improved planning processes.
- Better inventory management.
- Increased accountability measures.

Budget Performance Monitoring

Budget implementation remained a key management priority.

Management conducted regular reviews focusing on:

- Budget utilization rates.
- Expenditure control.
- Revenue realization.
- Variance analysis.
- Capital expenditure monitoring.

Departments and subsidiaries were encouraged to ensure that expenditures remained aligned with approved operational plans and organizational priorities.

Profitability Analysis

The profitability outlook for the Group remained positive during the reporting period.

Several factors contributed to profitability improvements:

Improved Operational Efficiency

Management initiatives aimed at improving productivity resulted in better utilization of resources and reduced inefficiencies.

Revenue Diversification

The development of multiple revenue streams reduced business risks and strengthened financial performance.

Strong Project Execution

Successful delivery of contracts improved client confidence and increased opportunities for repeat business.

Improved Financial Controls

Stronger oversight mechanisms enhanced accountability and reduced unnecessary expenditures.

Investment and Capital Expenditure Review

Management continued to evaluate investment opportunities capable of strengthening operational capabilities and supporting future growth.

Priority investment areas identified include:

Briech UAS

- Acquisition of advanced drone equipment systems.
- Data processing infrastructure.
- Flight operation support equipment.

Poctova Limited

- Automated garment production machinery.
- Industrial cutting systems.
- Showroom initiatives.

Luftrieber Automobile

- Workshop equipment upgrades.
- Diagnostic technology acquisition.
- Fleet expansion opportunities.

Giga Forensics

- Advanced forensic laboratory equipment.
- Cybersecurity infrastructure.
- Data analytics platforms.

These investments are expected to improve productivity and increase long-term profitability.

Financial Risks

Several financial risks were identified during the reporting period.

Exchange Rate Volatility

Foreign exchange fluctuations continued to affect:

- Equipment procurement.
- Spare parts acquisition.
- Technology purchases.
- Manufacturing inputs.

Inflation

Inflation increased:

- Logistics costs.
- Utility expenses.
- Labour-related costs.
- Raw material prices.

Delayed Client Payments

Some projects experienced delayed receivables, affecting cash flow management.

Market Competition

Increased competition exerted pressure on pricing structures and profit margins.

Financial Risk Mitigation Measures

Management implemented several measures to mitigate identified risks.

These included:

- Strengthening receivables management.
- Diversifying revenue streams.
- Improving budget discipline.
- Enhancing financial forecasting.
- Expanding client portfolios.
- Maintaining prudent expenditure controls.

Financial Sustainability Outlook

Management remains optimistic regarding the Group's long-term financial outlook.

The continued expansion of operational activities, coupled with strategic investments and improved governance structures, is expected to strengthen future financial performance.

The Group remains committed to maintaining financial discipline while pursuing growth opportunities capable of delivering sustainable value.

RISK, GOVERNANCE AND COMPLIANCE REPORT

Introduction

Effective risk management, governance, and regulatory compliance remain fundamental components of the EIB Group's operational framework.

Management recognizes that sustainable growth can only be achieved through robust governance systems, strong internal controls, and a culture of accountability.

During the reporting period, significant attention was devoted toward strengthening compliance processes and improving organizational risk management practices.

Governance Framework

The Group's governance framework is designed to ensure:

- Accountability.
- Transparency.
- Ethical conduct.
- Regulatory compliance.
- Effective decision-making.
- Strategic alignment.

The framework promotes responsible management practices across all subsidiaries while safeguarding stakeholder interests.

Compliance Management

Management continued monitoring compliance obligations across all operational sectors.

Key compliance areas included:

Aviation Compliance

Brieich UAS maintained adherence to applicable aviation regulations governing drone operations.

Areas monitored included:

- Flight authorizations.

- Pilot certification requirements.
- Operational safety procedures.
- Equipment maintenance standards.

Security Industry Compliance

EIB Stratoc maintained compliance with relevant security industry regulations and operational standards.

Data Protection Compliance

Giga Forensics continued implementing measures aimed at safeguarding sensitive information and ensuring responsible data handling practices.

Manufacturing Compliance

Poctova maintained adherence to applicable manufacturing standards, labour regulations, and workplace safety requirements.

Operational Risk Assessment

Management identified and monitored several operational risks.

Strategic Risks

- Market competition.
- Economic instability.
- Changing customer demands.
- Technological disruption.

Operational Risks

- Equipment failures.
- Project delays.
- Supply chain disruptions.
- Workforce shortages.

Financial Risks

- Inflation.
- Exchange rate volatility.
- Cash flow challenges.
- Credit exposure.

Regulatory Risks

- Policy changes.
- Compliance breaches.
- Licensing requirements.

Internal Control Systems

Management continued strengthening internal controls through:

- Periodic audits.
- Financial reviews.
- Operational monitoring.
- Performance evaluations.
- Compliance inspections.

These controls help minimize risks while improving accountability and operational efficiency.

Fraud Prevention and Detection

The Group maintains a zero-tolerance approach toward fraud and unethical conduct.

Preventive measures implemented include:

- Segregation of duties.
- Authorization controls.
- Procurement oversight.
- Financial monitoring.
- Employee awareness initiatives.

Management remains committed to promoting integrity across all levels of the organization.

Business Continuity Planning

To enhance organizational resilience, management reviewed contingency planning measures aimed at ensuring continuity of operations during unforeseen events.

Focus areas included:

- Technology resilience.
- Workforce continuity.
- Asset protection.
- Crisis response planning.

- Operational recovery procedures.

These initiatives improve the Group's ability to respond effectively to disruptions.

Governance Achievements During the Reporting Period

Key achievements included:

- Improved reporting structures.
- Enhanced management accountability.
- Strengthened compliance monitoring.
- Increased risk awareness.
- Improved operational transparency.

These achievements contribute positively toward the Group's long-term sustainability.

MANAGEMENT ACTION IMPLEMENTATION REPORT

Introduction

One of the key responsibilities of the Group Chief Operations Officer is ensuring that management decisions and executive directives are effectively implemented across all subsidiaries.

Accordingly, significant attention was devoted during the reporting period toward monitoring execution, evaluating outcomes, and ensuring accountability.

Executive Directives Issued

Several strategic directives were issued to subsidiary management teams during the reporting period.

These directives focused on:

Operational Excellence

- Improve service delivery standards.
- Strengthen operational controls.
- Increase productivity levels.
- Enhance customer satisfaction.

Revenue Growth

- Intensify business development efforts.
- Diversify customer portfolios.
- Improve proposal success rates.
- Expand market presence.

Human Capital Development

- Improve employee training.
- Strengthen leadership development.
- Enhance succession planning.
- Improve workforce engagement.

Compliance Enhancement

- Strengthen governance practices.

- Improve regulatory compliance.
- Enhance risk management processes.

Implementation Progress Review

Management conducted periodic reviews to monitor implementation progress.

The majority of directives issued have either been:

- Fully implemented.
- Substantially implemented.
- Ongoing and progressing satisfactorily.

Subsidiary management teams demonstrated commitment toward achieving assigned objectives.

Key Outcomes Achieved

Several positive outcomes were recorded as a result of management interventions.

These include:

Improved Operational Coordination

Collaboration among subsidiaries improved significantly during the reporting period.

Enhanced Accountability

Management reporting structures became more effective, resulting in improved visibility into operational performance.

Increased Business Development Activities

Subsidiaries intensified efforts aimed at identifying and pursuing new business opportunities.

Improved Compliance Culture

Awareness of compliance obligations increased across the organization.

Outstanding Matters

While substantial progress was achieved, several matters remain under active management attention.

These include:

- Expansion funding approvals.
- Infrastructure development projects.
- Technology acquisition initiatives.
- Market expansion activities.
- Workforce capacity building.

Management continues to monitor these areas closely to ensure successful completion.

Recommendations

To sustain implementation momentum, Management recommends:

- Continued performance monitoring.
- Increased accountability measures.
- Faster decision-making processes.
- Improved inter-company collaboration.
- Enhanced strategic communication.

These measures will support the achievement of future organizational objectives.

Conclusion

The implementation of management directives during the reporting period contributed significantly toward operational improvement, enhanced accountability, and stronger organizational performance.

Management remains committed to ensuring that all strategic initiatives are executed effectively and aligned with the long-term vision of the EIB Group of Companies.

COMPREHENSIVE SWOT ANALYSIS REPORT

Introduction

A detailed SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis was conducted for each subsidiary to evaluate current performance, identify strategic opportunities, and support future planning.

The findings provide management with valuable insights into the competitive position of each subsidiary and the actions required to sustain growth and profitability.

EIB STRATOC LIMITED

Strengths

- Strong reputation within the security industry.
- Experienced management team.
- Established client relationships within oil and gas and infrastructure sectors.
- Proven operational capability in high-risk environments.
- Effective project execution experience.
- Strong field operations capacity.
- Ability to deploy security personnel rapidly.

Weaknesses

- Rising operational costs.
- Limited technology integration in some operational areas.
- Increasing personnel management demands.

Opportunities

- Expansion into higher technology-driven security solutions.
- Critical national infrastructure protection projects.
- Government security contracts.
- Security consulting and advisory services.
- Regional expansion opportunities.

Threats

- Intense market competition.
- High risk operational areas
- Economic instability.
- Regulatory changes.
- Rising security threats requiring increased operational expenditure.

Strategic Outlook

Management should continue investing in technology-assisted security solutions while diversifying revenue streams beyond traditional security services.

GIGA FORENSICS LIMITED

Strengths

- Highly specialized technical expertise.
- Strong growth potential in the cybersecurity sector.
- Emerging reputation within digital forensic investigations.
- Access to advanced investigative technologies.
- Skilled technical workforce.

Weaknesses

- Limited market awareness.
- High technology acquisition costs.
- Dependence on specialized personnel.

Opportunities

- Increasing cybercrime incidents.
- Growing demand for digital investigations.
- Financial crime investigations.
- Corporate cybersecurity assessments.
- Government digital intelligence support.

Threats

- Rapid technological changes.
- Shortage of skilled cybersecurity professionals.
- Competitive international cybersecurity firms.

Strategic Outlook

The company should continue investing in advanced forensic capabilities while expanding public awareness and strategic partnerships.

BRIECH UAS LIMITED

Strengths

- Strong operational experience in drone technology.
- Highly trained UAV pilots and technical personnel.
- Proven pipeline surveillance capabilities.
- Strong reputation within the aviation industry.
- Diverse service offerings.

Weaknesses

- Regulatory limitations.
- High maintenance costs.
- Capital-intensive operations.

Opportunities

- Agricultural drone services.
- Mining inspections.
- Infrastructure monitoring.
- Environmental management.
- Smart city applications.
- Regional drone service expansion.

Threats

- Regulatory restrictions.
- Equipment procurement challenges.
- Technological obsolescence.
- Emerging competition.

Strategic Outlook

Briech UAS remains one of the Group's strongest growth drivers and should continue expanding into new industries and markets.

POCTOVA LIMITED

Strengths

- Functional garment manufacturing facility.
- Skilled tailoring and production workforce.
- Existing contracts with NYSC and DSS.
- Strong reputation for quality uniform production.
- Growing institutional customer base.
- Ability to execute large-scale production contracts.
- Strong quality control systems.

Weaknesses

- Dependence on government-related contracts.
- Rising fabric and raw material costs.
- Limited automation within production processes.
- Energy supply challenges affecting production efficiency.

Opportunities

- Nigerian Armed Forces uniform contracts.
- Police and paramilitary uniform production.
- Industrial workwear manufacturing.
- Personal Protective Equipment (PPE) production.
- Corporate uniform contracts.
- Regional export opportunities.
- Local content policy advantages.

Threats

- Competition from imported garments.
- Inflationary pressures.
- Exchange rate fluctuations.
- Supply chain disruptions.
- Government procurement delays.

Strategic Outlook

Poctova possesses significant growth potential and can evolve into one of Nigeria's leading institutional garment manufacturers through strategic investments in automation, capacity expansion, and market diversification.

LUFTTRIEBER AUTOMOBILE LIMITED

Strengths

- Technical expertise in vehicle maintenance.
- Fleet management capability.
- Existing customer relationships.
- Strong workshop operations.

Weaknesses

- Dependence on imported spare parts.
- Limited market visibility.
- Capital requirements for expansion.

Opportunities

- Fleet management contracts.
- Vehicle leasing.
- Corporate maintenance agreements.
- Technical training services.
- Government fleet support contracts.

Threats

- Economic downturn.
- Rising spare parts costs.
- Foreign exchange volatility.
- Increased competition.

Strategic Outlook

The company should focus on fleet management and corporate maintenance contracts as key drivers of future growth.

KEY ACHIEVEMENTS OF THE GROUP CHIEF OPERATIONS OFFICER

Introduction

The reporting period witnessed significant achievements under the leadership and coordination of the Office of the Group Chief Operations Officer.

The role of the GCOO remained central to ensuring effective execution of operational strategies, improving coordination among subsidiaries, and driving organizational performance.

Operational Leadership

The GCOO successfully provided operational oversight across all subsidiaries, ensuring:

- Alignment with Group objectives.
- Improved reporting structures.
- Enhanced operational accountability.
- Better resource utilization.
- Increased management visibility.

Strategic Coordination

The office coordinated strategic initiatives across the Group, including:

- Business development activities.
- Performance management systems.
- Operational improvement programs.
- Risk management initiatives.
- Workforce development activities.

Strengthening Inter-Company Collaboration

Greater collaboration was achieved among subsidiaries through:

- Shared operational resources.
- Knowledge exchange.
- Joint business development efforts.
- Integrated planning initiatives.

Performance Monitoring Improvements

Management reporting systems were strengthened through:

- Monthly operational reviews.
- Performance tracking mechanisms.
- Management action monitoring.
- Strategic implementation oversight.

Human Capital Development Support

The GCOO championed initiatives aimed at:

- Leadership development.
- Employee training.
- Workforce planning.
- Succession management.

Governance and Compliance Enhancement

Governance practices improved through:

- Increased accountability.
- Improved reporting compliance.
- Risk management awareness.
- Operational transparency.

CHALLENGES ENCOUNTERED DURING THE REPORTING PERIOD

Economic Challenges

The Group operated within a challenging economic environment characterized by:

- Inflation.
- Exchange rate instability.
- Rising operating costs.

Operational Challenges

Challenges encountered included:

- Equipment maintenance costs.
- Supply chain disruptions.
- Workforce recruitment difficulties.
- Infrastructure limitations.
- Power challenges

Financial Challenges

Management faced:

- Delayed receivables.
- Increased procurement costs.
- Budgetary pressures.
- Foreign exchange exposure.

Market Challenges

Competition intensified across several business sectors, requiring increased business development efforts and improved service delivery.

STRATEGIC RECOMMENDATIONS FOR 2026–2027

Revenue Diversification

All subsidiaries should pursue additional revenue streams to reduce dependence on a limited number of clients.

Technology Adoption

Greater investment should be made in:

- Automation.
- Data analytics.
- Artificial Intelligence applications.
- Operational management systems.

Human Capital Development

The Group should continue strengthening:

- Leadership development.
- Technical skills training.
- Workforce planning.
- Succession management.

Expansion Strategy

Priority should be given to:

- Regional market expansion.
- New product development.
- Strategic partnerships.
- Export opportunities.

Capital Investment

Investment priorities should include:

Briech UAS

- Advanced drone platforms.
- Data processing capabilities.

Poctova Limited

- Automated garment manufacturing systems.
- Factory expansion.

Giga Forensics

- Advanced cyber forensic laboratories.

Luftrieber Automobile

- Workshop modernization.
- Fleet expansion.

Governance Strengthening

Management should continue enhancing:

- Internal controls.
- Compliance monitoring.
- Risk management systems.
- Corporate governance practices.

CONCLUSION

The period from March 2026 to June 2026 was characterized by resilience, operational growth, strategic planning, and organizational strengthening across the EIB Group of Companies.

The Group successfully maintained operational continuity while pursuing strategic initiatives designed to improve long-term competitiveness and sustainability. Significant achievements were recorded across all subsidiaries, particularly in security services, digital forensics, unmanned aerial systems, garment manufacturing, , and automobile services.

Poctova Limited's successful execution of DSS uniform production contracts, Briech UAS's continued expansion of drone-based services, EIB Stratoc's strong security operations, and the growing market opportunities for Giga Forensics collectively demonstrate the Group's diversified strengths and growth potential.

The outlook for the remainder of 2026 remains positive. With continued investment, effective leadership, disciplined financial management, workforce development, and strategic execution, the EIB Group is well positioned to achieve sustainable growth and strengthen its position as a leading indigenous conglomerate.

The achievements recorded during this period are the result of collective effort, strong leadership, and unwavering commitment to excellence by the team.

As we move into the next phase of growth, management remains committed to innovation, operational excellence, accountability, and sustainable value creation for all stakeholders.

Respectfully Submitted,

Tesini p. Dombo
