

1. Executive Summary

Following the recent executive management meeting, the EIB Group is launching a massive strategic pivot. We are opening our world-class training infrastructure to government agencies, security institutions, and corporate partners. This high-tier, project-based training will run throughout the year in structured two-week residential cycles, providing a premium professional development experience valued at approximately N4 million per participant.

2. Accurate Subsidiary Alignment & Proposed Course Domains

To ensure our external marketing is accurate, we must align our training offerings with the actual operational reality of our subsidiaries. The following defines the correct operational capabilities and the respective high-value courses the Training Department will immediately begin developing:

Giga Forensics

Core Capability: Digital forensics, cybersecurity, and advanced intelligence applications.

- Course: Advanced Cybersecurity & Threat Intelligence
- Course: Digital Forensics & Evidence Recovery

Briech UAS

Core Capability: Unmanned Aerial Systems (Drone) operations, maintenance, and spatial intelligence.

- Course: Geographic Information Systems (GIS) Mapping & Spatial Analytics
- Course: Commercial Drone Piloting & Aerial Surveillance

EIB Stratoc

Core Capability: Advanced security, defense technology, and surveillance systems.

- Course: Strategic Security Operations & Defense Technology Management
- Course: Advanced Surveillance & Reconnaissance

POCTOVA

Core Capability: Industrial garment manufacturing, tactical gear, and uniform production.

- Course: Industrial Garment Production & Workflow Optimization
- Course: Tactical Gear Manufacturing & Quality Control

Luftreiber Automobile

Core Capability: Automotive engineering, fleet maintenance, and mobility technical solutions.

- Course: Advanced Fleet Management & Automotive Diagnostics

EIB GROUP

Training Programme Development & Strategic Alignment

- Course: Heavy Machinery & Armored Vehicle Maintenance

Brieuh Atlantic

Core Capability: Heavy project management, operations, and strategic maritime logistics.

- Course: Large-Scale Project Management & Logistics Optimization

3. Delivery Framework & Immediate Action Plan

As Group Head of Training, the responsibility of mobilizing this immense architecture lies with our department. We are executing the following immediately:

A. Annual Calendar & Timetable Development

We are constructing a full 1-year training calendar broken down into two-week intensive cycles. This calendar will be meticulously aligned with government budget cycles to maximize agency adoption.

B. Agency Invitation Protocol

Following the Chairman's preliminary briefings, we are drafting tailored, official invitation letters to targeted government Ministries, Departments, and Agencies (MDAs), and security organizations (e.g., Nigerian Air Force), requesting formal participant nominations.

C. Content & LMS Preparation

The Training Department is actively developing comprehensive, project-based course modules for GIS, Cybersecurity, Forensics, and operational management. These modules will be deployed directly onto our digital Learning Management System (LMS), complete with automated certification frameworks that validate participants' professional qualifications upon graduation.
